

Backup & Business Continuity Solutions

Datapac and Datto

By partnering with Datapac and Datto, your organisation can benefit from the local knowledge and skills of Ireland's leading ICT provider combined with world-class back-up and business continuity technologies from a global leader in this area.

Datapac offers a comprehensive range of end-to-end backup and business continuity solutions to keep your mission critical data protected and available. Whether on premise, in the cloud or a hybrid combination of both, we will find the ideal solution for you and let you focus on what you do best; adding value to your business.

As an experienced and highly accredited service provider, Datapac takes the time to understand your organisation's unique set of needs and matches it with an appropriate and scalable solution. We provide a proactive service that ensures any potential issues are identified and rectified before they become real live problems.

Thousands of organisations worldwide trust Datto's purpose-built cloud solutions and family of software and hardware devices to provide Total Data Protection to their business data.

DATTO SIRIS

SIRIS goes beyond simple backup to provide a true business continuity solution for businesses that can't endure any downtime. SIRIS delivers the most aggressive Recovery Time Objectives (RTOs) to keep your business running, even in the face of computer hardware failure, malware, or natural disasters.

- **Instant Virtualisation:** In the event of a disaster, it allows you to shift your business applications onto the virtual server in just six seconds. If the problem is more widespread, your entire network can be moved to the Cloud in a matter of minutes.
- **Incremental Backup:** SIRIS takes one full back-up when first installed. After that, incremental backups are automatically applied to the last, so at any time a full, current backup is ready for fast recovery.

- **Insights into your data:** This allows you to quickly and easily find specific files and identify which documents have been modified, created or deleted between backup points.
- **Screenshot Backup Verification** makes sure your backups are complete and applications are always ready to recover.
- **Easy file share** with secure file sync and share capabilities from SIRIS ownCloud. Share and access files from anywhere, using desktop or mobile devices.
- **Peace of mind** that your data is always 'recovery ready' and there are never any network errors or data corruption.

DATTO ALTO 2

ALTO 2 is the only continuity solution designed with small businesses in mind. It gives you a compact and powerful appliance that takes snapshots of your servers and workstations, before replicating them to the ultra-secure Datto Cloud, all for a minimal cost.

■ **Reduced Downtime:** Datto's hybrid cloud technology reduces downtime by saving backups both locally and in the cloud. This gives greater protection for your users' systems and data through advanced bandwidth management, local restoration, and full cloud data copies.

■ **Faster Recovery:** Thanks to incremental backups, you can also delete your oldest backup files to free up storage space and speed up recovery

■ **Backup Integrity** with a screenshot verification giving you confirmation that backups have been made without errors or data corruption.

■ **Total data protection** whatever your operating system is. ALTO 2 gives you peace of mind knowing that you have the best possible data protection in place.

PROVEN SOLUTIONS

Datapac has a long and proven track record in delivering end-to-end backup and business continuity solutions that include: hardware and software implementation; maintenance and support; and additional services such as disaster recovery testing.

DATAPAC MANAGED BACKUP AND BUSINESS CONTINUITY

Datapac offers comprehensive managed backup and business continuity services tailored to your organisation's bespoke needs. Whether it's a server crash, a power outage or your company's security is compromised by a cyber-attack, Datapac ensures your business is up and running with minimal data loss, customer frustration or reputational damage.

■ **Monitoring:** Our support team will proactively monitor your backup systems 24/7 to ensure your backups run smoothly.

■ **Alerting:** We will manage your backup and device utilisations alerts and provide fast incident remediation.

■ **Reporting:** We will issue customised reports on your backup infrastructure to give you a full overview of backups ran, errors, data failures and fixes.

DATAPAC DISASTER RECOVERY (DR) TESTING

Take advantage of our Disaster Recovery (DR) Testing programme and make sure you stay one step ahead of potential disasters. Having a trusted DR solution in place is important, but so is testing it on a regular basis.

During the test our DR expert will assess your Recovery Time Objectives (RTOs) as well as create your recovery documentation and procedures. We will present you with a detailed report containing any issues as well as a full list of recommendations.

HEAR WHAT OUR CUSTOMERS SAY

"Datapac has been able to draw on its extensive knowledge and expertise, and provide us with a resilient backup and business continuity solution that meets all of our requirements. The new virtualised servers and continuous backup to the cloud will ensure the security and availability of all data held by Barretstown, including sensitive information like the medical records of children staying on camp."

John Fitzgerald, operations director, Barretstown
